4. Technical Specifications

EARBUDS

- Frequency response: 20 Hz – 20 kHz
- Impedance: 16 Ω
- Sensitivity: 91 dB @ 1 mW / 1 kHz
- Input power: 5 mW (max input)
- Drivers: 10 mm
- Connection type: Razer HyperSpeed Wireless Dongle / Bluetooth 5.2

MICROPHONE

- Pick-up pattern: Omnidirectional
- Signal-to-noise ratio: 64 dB
- Sensitivity: -26 dBFS

SYSTEM REQUIREMENTS

- Devices with Bluetooth audio capability or USB Type C / USB Type A port
- Smartphone app available for Android and iOS
- Supported codecs: SBC, AAC

5. Setting Up Your Razer Hammerhead Hyperspeed for Meta Quest

CHARGING YOUR EARBUDS

For first-time use, connect the charging case to a USB port using the charging cable without removing the earbuds. For subsequent use, the charging case and the earbuds can be charged independently.

CONNECTING TO YOUR EARBUDS

A. Via Bluetooth

1. While inside the charging case, open the lid and wait for the earbuds to enter pairing mode.

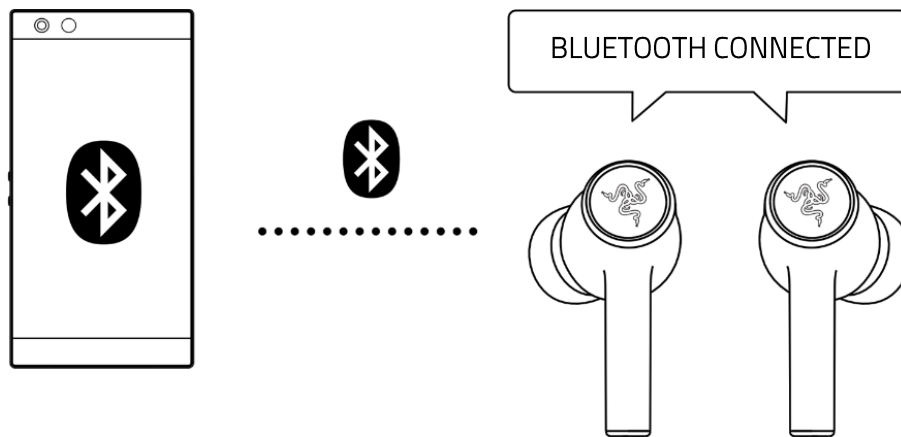

i When trying to connect your Razer product, remember to keep it within 1 meter of your mobile device. By default, the earbuds will search for the wireless dongle before activating pairing mode.

2. Activate Bluetooth on your device and select "**Razer Hammerhead HyperSpeed (BT)**" from the list of devices found.

3. Wait until both devices are connected. You will hear an audio prompt when the earbuds have successfully paired and connected to your device.

If the earbuds fail to connect to your device, the earbuds will stay in search mode and power off after 3 minutes. If this happens, place the earbuds back inside the charging case and repeat the steps above.

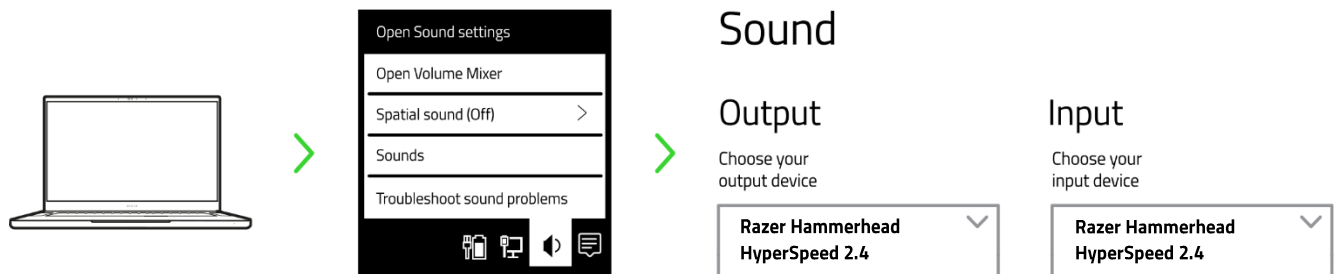

-  *Once the earbuds have been paired, they will automatically try to connect to that paired mobile device every time the charging case's lid is opened or the earbuds are powered on. Your earbuds can only connect to one mobile device at a time.*

B. Via Razer HyperSpeed Wireless Dongle (2.4 GHz)

1. Plug the wireless dongle into your device.

2. On your device (if applicable), set the Razer Hammerhead HyperSpeed as the default **Input** and **Output Device**.

i When the earbuds are connected to your Meta Quest headset via the wireless dongle, the earbuds will only be used for audio output and the headset's built-in microphone will still be used for audio input.

3. If your earbuds use Bluetooth as the audio source, tap the function button thrice on any earbud to set the wireless dongle as the audio source.

i This step is only applicable if the earbuds are connected to your device via Bluetooth.

4. Wait until your earbuds are connected to the wireless dongle.

PERSONALIZE YOUR EXPERIENCE

Remap touch gestures, enable Active Noise Cancellation (ANC), customize EQ settings, and even experience full RGB lighting customization from your mobile device.

Razer Audio

RZR.TO/AUDIO-APP

i Only available on iOS 14 / Android 10 (or higher) devices with Bluetooth connectivity

6. Using Your Earbuds

SWITCHING BETWEEN AUDIO SOURCES

When connected to any audio source, tap the function button thrice to switch between the wireless dongle and Bluetooth audio source or vice versa.

POWER ON/OFF

Place the earbuds inside the charging case and close the lid to power off the device. Opening the lid if they are in the charging case will power them on.

If the earbuds are left idle outside the charging case for a few minutes, you will hear an audio prompt, and then the earbuds will power off.

Tap and hold the function button on each earbud for at least 2 seconds to power them on again. You will hear an audio prompt from each earbud once powered on.

BATTERY LEVEL

When unplugged and opened, the charging case will show the battery status of the charging case.

Indicator		Battery level
Solid blue		Full
Solid orange		Low
Blinking red		Critical

UNDERSTANDING RAZER SMARTSWITCH

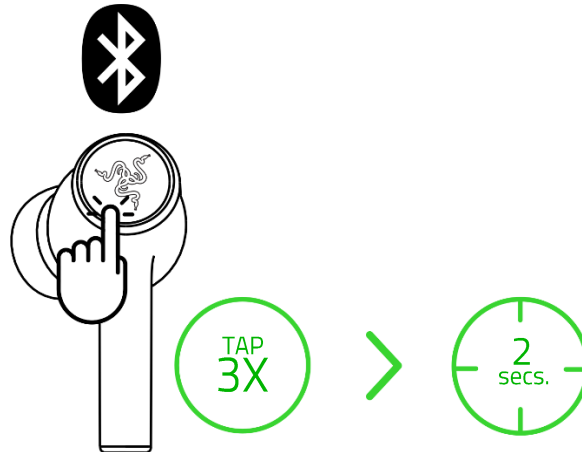

With the Razer Hammerhead HyperSpeed simultaneously connected to a PC or device (via the Razer HyperSpeed Wireless Dongle) and a mobile device (via Bluetooth), you'll be able to use the earbuds for incoming/outgoing/conference calls from a connected Bluetooth device and switch back to wireless dongle audio without removing the earbuds.

The following behaviors below will help you understand how your earbuds respond to audio source switching and incoming/outgoing/conference calls when your earbuds are connected to a Bluetooth device and the wireless dongle:

Activity	Razer SmartSwitch behavior
Streaming via Razer HyperSpeed Wireless Dongle	<ul style="list-style-type: none"><li data-bbox="435 688 1472 814">▪ The earbuds will automatically switch to Bluetooth audio source for incoming/outgoing/conference calls from your mobile device and resume using the wireless dongle after each call.  <i>You can deactivate automatic source switching for incoming calls by enabling your earbud's Do Not Disturb feature on the Razer Audio app.</i><li data-bbox="435 936 1472 1014">▪ Audio from the connected mobile device will ONLY automatically stream on the earbuds if no audio is present or streaming on the wireless dongle.<li data-bbox="435 1037 1472 1115">▪ Auto-pause on streamed audio when switching audio sources depends on the app you're using (e.g., Spotify, Apple Music).
Streaming via Bluetooth	<ul style="list-style-type: none"><li data-bbox="435 1163 1472 1289">▪ When you switch to the wireless dongle audio source, your earbuds will remain connected to your mobile device via Bluetooth. However, the Razer Audio app will disconnect from your mobile device.<li data-bbox="435 1312 1472 1390">▪ Auto-pause on streamed audio when switching audio sources depends on the app you're using (e.g., Spotify, Apple Music).
Not streaming on any audio source	Audio will play on the first audio source that streams audio.

GAMING MODE

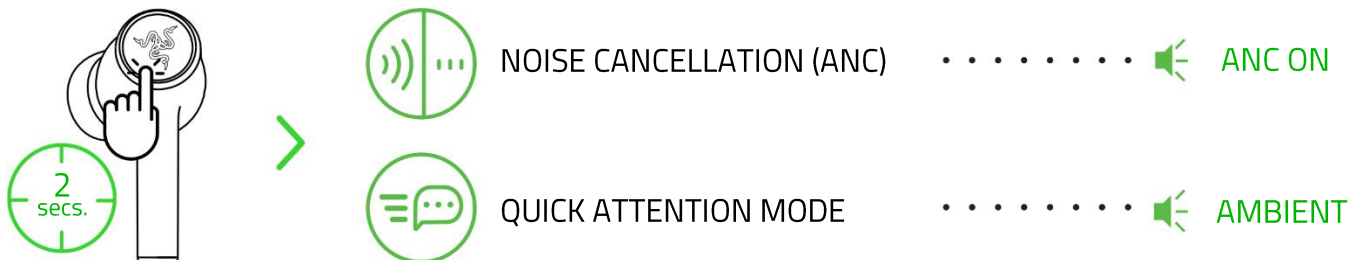

When using Bluetooth as the audio source, triple tap, then hold the last tap for at least 2 seconds on any earbud to activate gaming mode. Once enabled, your earbuds will function at a lower latency, giving you real-time audio feedback while gaming. Repeat the same gesture to deactivate this feature.

i For best performance, keeping your earbuds within a very close distance of the audio source is recommended.

ACTIVE NOISE CANCELLATION (ANC) / QUICK ATTENTION MODE

Active Noise Cancellation (ANC) helps eliminate background noise for enhanced immersion, while Quick Attention Mode improves your awareness by feed-forwarding the sound of your surroundings into the earbuds. While connected to any audio source, tap and hold on any earbud for at least 2 seconds to activate ANC and repeat to activate Quick Attention Mode.

i An audio prompt will notify you when ANC and Quick Attention Mode have been enabled. Complete customization of these functions can be made using the Razer Audio app.

FUNCTION BUTTON QUICK REFERENCE

The following default gestures are available on the earbuds. You can remap these gestures using the Razer Audio App.

Action	Effect
Tap	Play/pause*
	Accept incoming call or end the current call
Tap and hold for 2 seconds	Reject incoming call or end the current call
	Power on the corresponding earbud
	Cycle between Enable ANC and Enable Quick Attention Mode
Tap and hold for 4 seconds	Activate Bluetooth pairing mode
Double tap	Accept incoming call or switch calls
	Skip to the next track when playing media
Double tap, then hold the last tap for 2 seconds	Decrease volume (on the left earbud)*
	Increase volume (on the right earbud)*
Triple tap	Switch between Bluetooth and wireless dongle audio source
Triple tap, then hold the last tap for 2 seconds	Enable/disable Gaming Mode (Bluetooth mode only)

**Limited functionality on selected devices.*

USING THE SILICONE EAR-TIPS

The silicone ear-tips offer increased comfort, sound isolation, and security. Various size options let you achieve a comfortable and secure fit that effectively reduces unwanted noise.

Removal

Replacement

i *Due to individuals' different ear canal sizes, it's recommended to interchange the ear-tips to a larger or smaller size to improve comfort and sound quality and achieve a proper seal.*

7. Safety and Maintenance

SAFETY GUIDELINES

To achieve maximum safety while using your Razer Hammerhead HyperSpeed for Meta Quest, we suggest that you adopt the following guidelines:

Should you have trouble operating the device properly and troubleshooting does not work, unplug the device and contact the Razer hotline or go to support.razer.com for assistance.

Do not take apart the device, and do not attempt to operate it under abnormal current loads. Doing so will void your warranty.

Operate the device only within the specific temperature range of 0°C (32°F) to 40°C (104°F). Should the temperature exceed this range, unplug and/or switch off the device to let the temperature stabilize to an optimal level.

Your earbuds isolate external ambient sounds even at low volumes, resulting in lowered awareness of your external surroundings. Please remove the earbuds when engaging in activities that require active awareness of your surroundings.

Listening to excessively loud volumes over extended periods can damage your hearing. Furthermore, legislation of certain countries permits a maximum sound level of 86db to affect your hearing for 8 hours a day. We, therefore, recommend that you reduce the volume to a comfortable level when listening for prolonged periods. Please, take good care of your hearing.

MAINTENANCE AND USE

The Razer Hammerhead HyperSpeed for Meta Quest requires minimum maintenance to keep it in optimum condition. Once a month, we recommend you clean it using a soft cloth or cotton swab to prevent dirt buildup. Do not use soap or harsh cleaning agents.
