

This video is a step-by-step process in adding users to your home in the Gamer Room App.

Adding users to your home allows them to have access and control to the devices inside your home through the Gamer Room app.

Let's get started.

Open the Gamer room app.

Tap the Menu icon at the upper-right corner of the screen and choose "Invite a User".

Enter the Razer ID email of the user you want to invite then click "Invite".

Advise the recipient to open the Gamer Room app on their phone.

Tap the Menu icon at the upper-right corner of the screen and choose "View Invites".

Tap "Accept Invite" and wait for the process to complete.

There you have it. The user is now successfully added to your home.
