This video is a step-by-step process on how to set up your Razer Key Light Chroma.

Let's get started.

Loosen the adjustment knob until you fully disassemble the ball-head mount.

Position the support column's mount groove inside the ball-head mount, then tighten the adjustment knob to lock it in place.

Securely fasten the extendable column onto the table clamp.

Loosen the clamp adjustment lever until you can slide the table clamp opening towards the edge of your table.

Tighten the clamp until it's secured in place. Ensure it is flush against the edge of your table.

If you are installing the support column assembly to an area where full lever rotation is limited, pull and rotate the clamp adjustment lever to reposition its starting point.

Securely fasten the Razer Key Light Chroma onto the ball-head screw.

Tighten the adjustment knob to lock it in place.

Connect the power adapter to the Razer Key Light Chroma with the correct AC plug for your region.

Plug the power adapter into a power outlet.

You can attach the extension cable to the power adapter for a longer reach.

Switch on the Razer Key Light Chroma.

And there you have it, the Razer Key Light Chroma is now ready for use.
