This video is a step-by-step process in assembling the Razer Iskur X gaming chair.

To start, take out all the components of the chair from the box.

The gaming chair is heavy. Lift it with caution.

Take the screws "K", washers "M" and hex key "N".

Attach the backrest "A" to seat "B".

Place the washers "M" on the screw "K".

Fasten the screw "K" on the support bracket using the hex key "N".

Repeat for both sides.

Take the screws "L" and use them to fasten the side covers "D" and "E" with the hex key "N".

Use the plastic screw caps "P" and "Q" to cover the screws "K".

Take the washers "O" and peel off the white plastic cover.

Place the washers "O" in the holes behind the seat "B".

Prepare the tilt mechanism "G".

Using the screws "J", fasten the tilt mechanism "G" on the seat "B" with the hex key "N".

Get the caster wheels "F".

Push each caster wheel "F" on the slots of the wheelbase "C" to click in.

Flip the wheelbase "C".

Insert the cylinder "I" on the wheelbase "C" and cover it with the cylinder cover "H".

Attach and tighten the wheelbase "C" to the chair.

Flip the chair.

There you have it. You have now assembled the Razer Iskur X gaming chair.
