

## How to export and import macros in Razer Synapse 4

This video is a step-by-step process on how to export and import macros in Razer Synapse 4.

Macros are repetitive commands or routine actions that can be recorded and assigned to your keyboard keys.

Before we proceed, note that Synapse 3 macro files will not work with Synapse 4 and vice versa.

Let's get started.

To export macros, open Razer Synapse 4 and go to the "MACRO" tab.

Under the macro list, select the macro you want to export.

Click on the 3-dot icon next to the macro name.

Click "Export."

Choose where you want to save the macro file. Click "Save."

To import macros, ensure you have access to the exported or saved macro files on your computer.

Open Razer Synapse 4 and go to the "MACRO" tab.

Click on the 3-dot icon next to the macro name.

Click "Import."

Browse to the location of your macro files and select the macro you want to import.

Click "Open."

The selected macro will be added to your macro list.

Congratulations! You have successfully exported and imported macros in Razer Synapse 4.
