

This video is a step-by-step process on how to register a Razer Product.

In this video, we'll show you how to register your Razer product to your Razer ID using Razer Synapse.

Registering your product gives you quick access to your product information, faster support, and other Razer account benefits.

Let's get started.

First, launch Razer Synapse 4 and select the Razer device you want to register in the "DASHBOARD".

Under PRODUCT REGISTRATION on your product's tab, click on "Register Online".

This will redirect you to the razerid.razer.com/products page.

However, if you have not logged in with your Razer ID on your browser yet, you will be asked to log in first.

You will be taken to the Product Registration page.

Log in with your Razer account.

Next, click on "REGISTER A NEW PRODUCT" then provide the following information:

Serial Number or Unique ID

Product Number

Date of Purchase

Place of Purchase

Proof of Purchase

For help on how to find the serial number on a Razer product, click "Locate your serial number" or check out the link in the description.

After providing all the details, click "SUBMIT"

You will be redirected to the "MY PRODUCTS" page with your product already listed.

Congratulations! You have successfully registered your Razer product.
